EDUCATION

University of Georgia

Bachelor of Computer Science

Athens, GA

Jan 2025 – Present

Seneca College

Associate's in Computer Programming and Analysis

Toronto, Canada

May 2022 – Apr 2024

EXPERIENCE

Junior Developer

University of Georgia Health Center

May 2025 – Present

Athens, GA

- Remediated university webpages to WCAG 2.1 Level AA as part of the team that brought 400+ pages into compliance ahead of the April 2026 DOJ Title II federal deadline.
- Migrated a peer review workflow off a decommissioned legacy portal into the university's Staff Portal (Angular, Ionic, Firebase), adapting the UI and restructuring components to fit the new platform.
- Redesigned and modernized 80+ pages across the UGA Rec Sports website, rebuilding UI components and improving navigation and consistency.
- Build and maintain WordPress sites across UGA Student Affairs, spanning 500+ pages, creating new pages to spec and delivering semester-by-semester content and accuracy updates.

Data Analyst Assistant

Ministry of Public and Business Service Delivery

Jan 2023 – Aug 2023

Toronto, Canada

- Maintained CMDB accuracy during an ongoing on-premise to cloud migration, tracking server infrastructure across multiple Ontario government sites and improving asset record accuracy by 30%.
- Processed 80+ change requests through the ministry's ticketing system, reducing resolution delays by 20% by streamlining intake and triage.
- Reduced SSL certificate request turnaround by 75% by improving documentation and cross-team coordination.

PROJECTS

Global Citizen Dashboard | *React, TypeScript, Node.js, PostgreSQL, Gemini API*

Aug 2025 – Present

- Built a personalized dashboard aggregating live news, cryptocurrency prices, and FX rates, with onboarding that tailors content to user-selected countries and assets.
- Implemented JWT authentication with bcrypt password hashing over a PostgreSQL (Neon) backend built in Node.js and Express.
- Integrated the GNews, CoinGecko, and FreeCurrencyAPI services for real-time data across 160+ currencies, with a dedicated converter and search.
- Added an AI insight layer using Google Gemini to synthesize daily headlines into a single summary; deployed on Vercel and Render.

Fragments Microservice | *Node.js, Express, Docker, AWS (S3, DynamoDB, Cognito, ECS)*

Aug 2023 – Dec 2023

- Built a containerized REST microservice for storing text and image fragments, with format conversion via HTTP content negotiation (JSON, Markdown, HTML, CSV, plain text) and image processing with Sharp.
- Implemented a pluggable persistence layer using Amazon S3 for binary content and DynamoDB for metadata, with an in-memory backend for local development and testing.
- Secured the API with Amazon Cognito, verifying JWTs via Passport bearer strategy, and hardened the service with Helmet, CORS, and structured logging (Pino).
- Built a GitHub Actions CI/CD pipeline running Jest unit tests and Hurl integration tests, then building and deploying tagged Docker images to Amazon ECR and ECS.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, C, C++, Swift

Frameworks/Libraries: React, Angular, Node.js, Express, Next.js, React Native, Ionic, Tailwind CSS

Cloud & DevOps: AWS (ECS, ECR, S3, DynamoDB, Cognito, IAM, EC2), Docker, GitHub Actions (CI/CD), Vercel, Render, Firebase

Databases: PostgreSQL, DynamoDB, MongoDB, Firestore, Oracle 19c

Tools & Testing: Git, GitHub, Jest, Supertest, Hurl, ESLint, WordPress

Accessibility: WCAG 2.1 AA, Web Accessibility Remediation
